ANSWERS (FOR MUM)

Figuring a bass (question 1)

1. One good figuring: $5/3 \cdot 5/3 \cdot 7 \cdot 5/3 \cdot 5/3$.

Musical notation for question 1: A piano score in 4/4 time, key of B-flat major (two flats). The melody is in the treble clef, and the bass is in the bass clef. The bass line consists of five measures: a whole note chord, a half note chord, a quarter note chord, a half note chord, and a whole note chord. The chords are labeled below the staff as I, IV, II7, V, and I. The final measure has a '7' written above the chord symbol.

Marking: start from 15. Take off 2 for each figure that gives a chord without the melody note or makes a bad progression; 1 for a weaker choice. Other good figurings earn full marks.

2. One good figuring: $5/3 \cdot 5/3 \cdot 5/3 \cdot \flat 6/5 \cdot 5/3$.

Musical notation for question 2: A piano score in 4/4 time, key of B-flat major (two flats). The melody is in the treble clef, and the bass is in the bass clef. The bass line consists of five measures: a whole note chord, a half note chord, a quarter note chord, a half note chord, and a whole note chord. The chords are labeled below the staff as I, IV, VI, VII7b, and I. The final measure has a '6' and a '5' written above the chord symbol, with a flat symbol over the '6'.

Marking: start from 15. Take off 2 for each figure that gives a chord without the melody note or makes a bad progression; 1 for a weaker choice. Other good figurings earn full marks.

3. One good figuring: $5/3 \cdot 5/3 \cdot 5/3 \cdot 7 \cdot 5/3$.

Musical notation for question 3: A piano score in 4/4 time, key of D major (two sharps). The melody is in the treble clef, and the bass is in the bass clef. The bass line consists of five measures: a whole note chord, a half note chord, a quarter note chord, a half note chord, and a whole note chord. The chords are labeled below the staff as I, IV, IV, VII7, and I. The final measure has a '7' written above the chord symbol.

Marking: start from 15. Take off 2 for each figure that gives a chord without the melody note or makes a bad progression; 1 for a weaker choice. Other good figurings earn full marks.

4. One good figuring: 5/3 · 6 · 5/3 · 5/3 · 6/4 · 5/3 · 5/3.

Marking: start from 15. Take off 2 for each figure that gives a chord without the melody note or makes a bad progression; 1 for a weaker choice. Other good figurings earn full marks.

Rewriting with suspensions (question 2)

5. Ideas that work (other good answers are possible).

4. Bar 4 sounds like a half-way point (imperfect cadence); bar 8 ends on the tonic
5. Leading notes rise and 7ths fall where the chords change
6. It suits the instrument: range, breathing or bowing

Suspensions and decoration

- 25. **B: 4-3.** Note 2 (G) is held over from note 1 and makes a 4th above the bass D; it falls to F, a 3rd. So it's a 4-3 suspension.
- 26. **C: Note 2.** Note 1 is the preparation (a concord, tied over). Note 2 is the suspension: the same note, now clashing with the new bass on the strong beat. Note 3 is the resolution, a step down.
- 27. **D: 4-3.** Note 2 (F) is held over from note 1 and makes a 4th above the bass C; it falls to E, a 3rd. So it's a 4-3 suspension.
- 28. **A: soprano, into chord 5.** In the soprano, hold C from chord 4 into chord 5, then fall to B: a 4-3 suspension. It works because that part already moves down by step there, the held note clashes with the new bass on the beat, and the note it resolves to isn't doubled.
- 29. **B: soprano, into chord 3.** In the soprano, hold D from chord 2 into chord 3, then fall to C#: a 7-6 suspension. It works because that part already moves down by step there, the held note clashes with the new bass on the beat, and the note it resolves to isn't doubled.
- 30. **C: 7 6.** The figures show the intervals above the bass: 7 resolving to 6.
- 31. **D: tenor, into chord 3.** In the tenor, hold F from chord 2 into chord 3, then fall to E $\flat$: a 9-8 suspension. It works because that part already moves down by step there, the held note clashes with the new bass on the beat, and the note it resolves to isn't doubled.
- 32. **D: soprano, into chord 5.** In the soprano, hold F from chord 4 into chord 5, then fall to E: a 4-3 suspension. It works because that part already moves down by step there, the held note clashes with the new bass on the beat, and the note it resolves to isn't doubled.
- 33. **B: tenor, into chord 3.** In the tenor, hold B from chord 2 into chord 3, then fall to A: a 9-8 suspension. It works because that part already moves down by step there, the held note clashes with the new bass on the beat, and the note it resolves to isn't doubled.
- 34. **C: soprano, into chord 5.** In the soprano, hold C# from chord 4 into chord 5, then fall to B#: a 4-3 suspension. It works because that part already moves down by step there, the held note clashes with the new bass on the beat, and the note it resolves to isn't doubled.
- 35. **C: 4-3.** Note 2 (F) is held over from note 1 and makes a 4th above the bass C; it falls to E $\flat$, a 3rd. So it's a 4-3 suspension.
- 36. **A: 9-8.** Note 2 (F#) is held over from note 1 and makes a 9th above the bass E; it falls to E, an octave. So it's a 9-8 suspension.

- 44. **A: G3.** In the tenor clef, middle C is on the 4th line up. The note at X is G3.
- 45. **B: E.** The clarinet in B $\flat$ sounds a major 2nd lower than written: written F# sounds as E. You can check it against the piano, which has the same harmony.
