Day 49: Grade 7: what's new

G7 Chords · about 40 minutes: warm-up 5 · teach 10 · together 10 · on his own 12 · game 3

1 · WARM-UP (5 MIN)

Today's practice in Philip's corner, or the first two 'together' questions below.

2 · TEACH (10 MIN)

Say: *"Grade 7 asks you to think like a composer from the 1700s: you'll read and write figured bass, decorate harmony with suspensions, and find your way around a full orchestra."*

- Grade 7 is again 3 hours on paper, out of 100 (pass 66, merit 80, distinction 90).
- Question 1 (15): the melody and bass of a passage are given; you write figures under the bass to show the chords. Question 2 (15): rewrite a plain passage adding suspensions and decoration. Question 3 (20): write a melody over a chord plan, or a solo part over a piano accompaniment. Question 4 (25): a score with a solo instrument (often transposing, or in a C clef) and piano. Question 5 (25): a full orchestral score of up to 14 staves.
- New chords: secondary 7ths, the diminished 7th and the Neapolitan 6th, plus all the figures used from about 1620 to 1790.

Worked example

Which Grade 7 question is worth the most?

1. Questions 4 and 5 (the scores) are 25 marks each.
2. Question 3 (composing) is 20.
3. Questions 1 and 2 are 15 each.

Watch out for

- Thinking Grade 7 question 1 is the same as Grade 6: now the melody is given and YOU write the figures.

In the exam: Five questions, 3 hours. Leave 25 minutes at the end to check.

Show him these cards

1

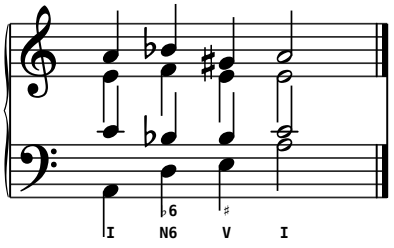

Grade 7 is 3 hours, on paper, out of 100: pass 66, merit 80, distinction 90. Same as Grade 6, but the questions change.

2

Q1: figure a bass under a given melody. Q2: add suspensions and decoration. Q3: write a melody over chords. Q4: a solo instrument with piano. Q5: a full orchestral score.

3

New chords: secondary 7ths, the diminished 7th and the Neapolitan 6th.

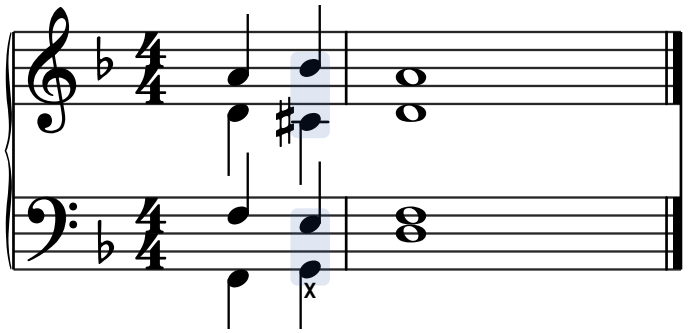

3 · DO TOGETHER (10 MIN)

- Look at the Grade 7 section of the reference book together and tick off what he already knows from Grade 6.

Four questions to work through together

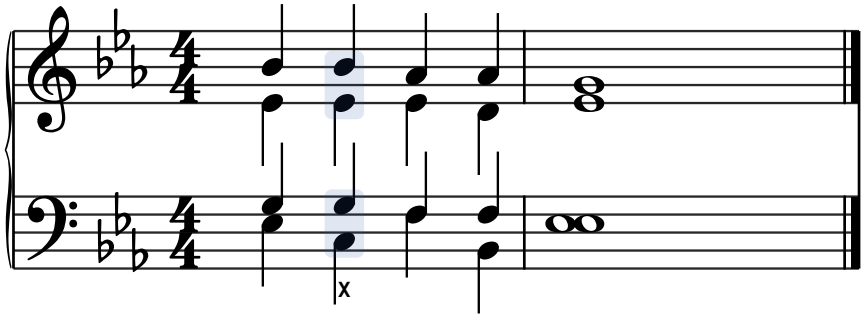

1. This passage is in D minor. What kind of chord is X?

A. a Neapolitan 6th B. a secondary 7th C. a diminished 7th D. a dominant 7th

Answer: a secondary 7th. X is C–E♭–G–B♭ (VI7): a secondary 7th. A 7th chord on a degree other than V. Its 7th is normally prepared and falls by step.

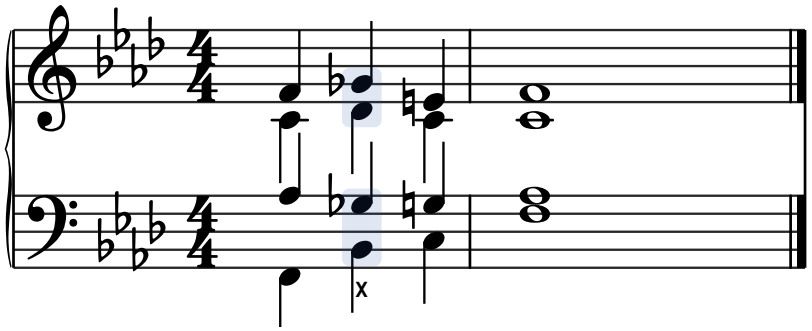

3. This passage is in D major. Name the chord marked X.

A. I7 B. VII7c C. II7b D. VIb

Answer: I7. X is D–F♯–A–C♯ with D in the bass: I7, a secondary 7th, root position.

4. This passage is in F minor. Name the chord marked X.

A. N6 B. II7d C. I7b D. VIIb

Answer: N6. X is G♭–B♭–D♭ with B♭ in the bass: N6, a Neapolitan 6th (the major chord on the flattened supertonic, in first inversion).

Day 50: Secondary 7ths: II7 and IV7 in every position

G7 Chords · about 40 minutes: warm-up 5 · teach 10 · together 10 · on his own 12 · game 3

1 · WARM-UP (5 MIN)

Today's practice in Philip's corner, or the first two 'together' questions below.

2 · TEACH (10 MIN)

Say: *"A 7th chord has four notes. Wherever it is, the 7th is a clash that needs to fall by step."*

- A secondary 7th is a 7th chord on any degree except V. The most common is II7 (D–F–A–C in C major), then IV7 (F–A–C–E).
- Figures are the same as for V7: 7 (root), 6/5 (b), 4/3 (c), 4/2 (d).
- The 7th is usually prepared (heard in the same part in the chord before) and must fall by step. II7 goes to V (or Ic–V); IV7 goes to V.

Worked example

In C major, spell II7 and give its figures in each position.

1. II7 = D–F–A–C.
2. Root position (D in the bass): 7. First inversion (F): 6/5. Second (A): 4/3. Third (C): 4/2.
3. The 7th, C, falls to B when II7 goes to V.

Watch out for

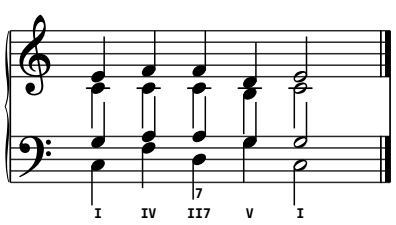

- Letting the 7th rise or leap.
- Forgetting the 7th in the figures (writing 6 instead of 6/5).

In the exam: Question 4 and 5 ask you to name chords like II7b; question 1 expects you to use them in figures.

Show him these cards

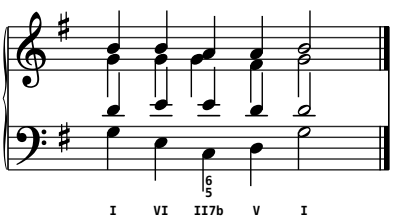

1

A secondary 7th is a 7th chord on any degree except V. The most common: II7.

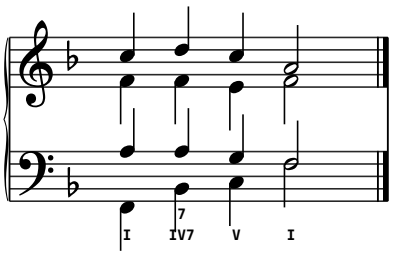

2

II7b (figured 6/5) before V is a favourite at cadences.

3

IV7 goes to V: its 7th falls by step.

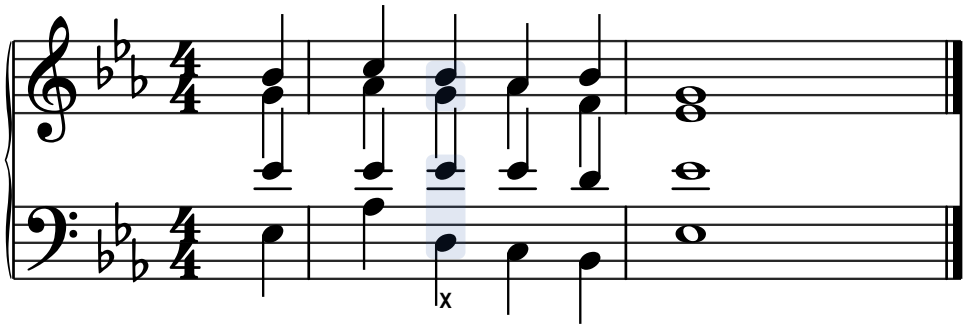

3 · DO TOGETHER (10 MIN)

- Write II7 and IV7 in C, G and F major in all four positions, with figures.

Four questions to work through together

Answer: 4/3. X is II7c (G–B♭–D–F). Counting up from the bass D: 4 3.

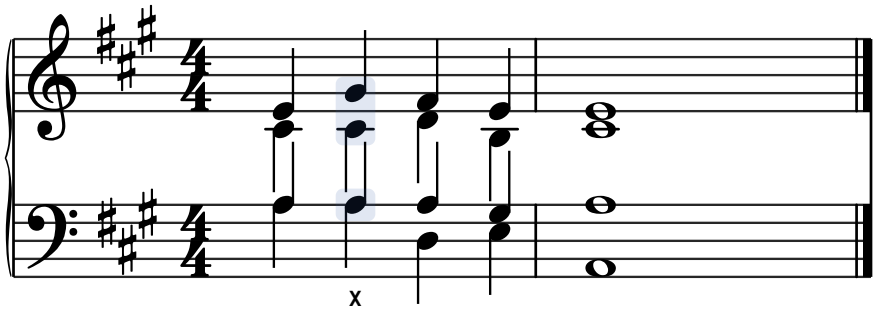

3. This passage is in C minor. What kind of chord is X?

A. a secondary 7th B. a half-diminished 7th (VII7 in a major key) C. a Neapolitan 6th D. a diminished 7th

Answer: a diminished 7th. X is B–D–F–A♭ (VII7d): a diminished 7th. Built on the raised leading note, it is a stack of minor 3rds; it resolves to I.

4. This passage is in A major. What kind of chord is X?

A. a dominant 7th B. a secondary 7th C. a diminished 7th D. a Neapolitan 6th

Answer: a secondary 7th. X is A–C♯–E–G♯ (I7): a secondary 7th. A 7th chord on a degree other than V. Its 7th is normally prepared and falls by step.

Day 51: Secondary 7ths: I7 and VI7

G7 Chords · about 40 minutes: warm-up 5 · teach 10 · together 10 · on his own 12 · game 3

1 · WARM-UP (5 MIN)

Today's practice in Philip's corner, or the first two 'together' questions below.

2 · TEACH (10 MIN)

Say: *"A chain of 7ths is like a row of dominoes: each 7th falls and pushes the music on to the next chord."*

- I7 (C–E–G–B in C major) usually goes to IV: the 7th, B, falls to A.
- VI7 (A–C–E–G) usually goes to II or II7: the 7th, G, falls to F. VI7–II7–V7–I is a chain of 7ths.
- In a minor key the secondary 7ths use the harmonic minor, so take care with the raised leading note.

Worked example

Where does each 7th go in I–VI7–II7–V7–I in C?

1. VI7 = A–C–E–G: G falls to F in II7.
2. II7 = D–F–A–C: C falls to B in V7.
3. V7 = G–B–D–F: F falls to E in I.

Watch out for

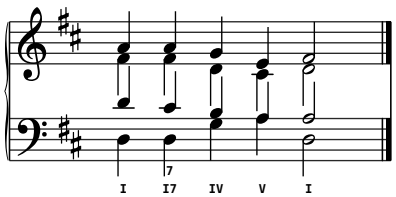

- Writing VI7 in a minor key without checking the raised leading note.

In the exam: Chains of 7ths often appear in the score questions: name each chord and its position.

Show him these cards

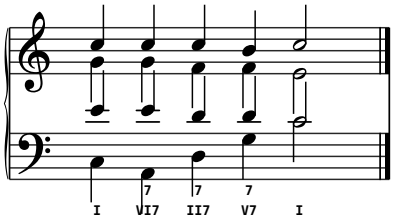

1

I7 goes to IV: the 7th of I (the leading note) falls.

2

A chain of 7ths: I–VI7–II7–V7–I. Each 7th falls into the next chord.

3

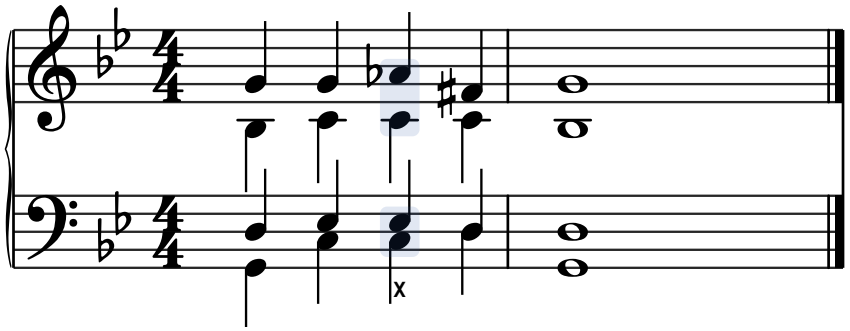

Prepare the 7th: have the same note in the same part in the chord before.

3 · DO TOGETHER (10 MIN)

- Write the chain I–VI7–II7–V7–I in C and in G, then play it.

Four questions to work through together

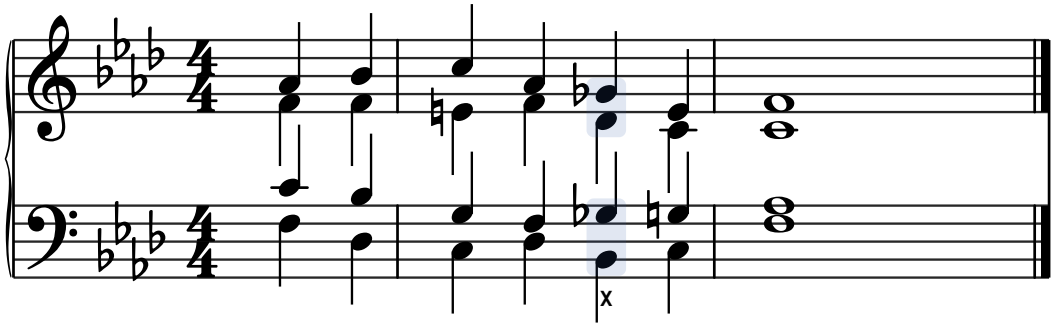

1. This passage is in G minor. Name the chord marked X.

A. VIb B. N6 C. Vb D. VIIb

Answer: N6. X is A♭–C–E♭ with C in the bass: N6, a Neapolitan 6th (the major chord on the flattened supertonic, in first inversion).

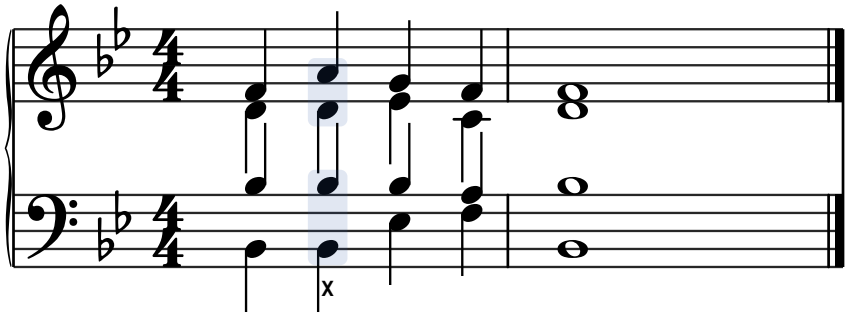

2. This passage is in F minor. What kind of chord is X?

A. a half-diminished 7th (VII7 in a major key) B. a dominant 7th C. a diminished 7th D. a Neapolitan 6th

Answer: a Neapolitan 6th. X is G♭–B♭–D♭ (N6): a Neapolitan 6th. Its root is the flattened 2nd of the scale; it usually comes in first inversion and goes to V or Ic–V.

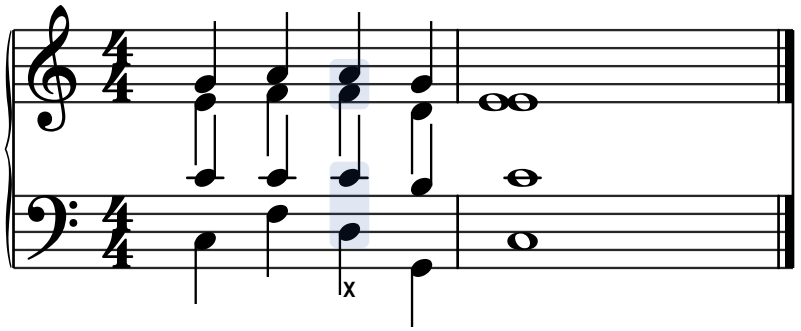

3. This passage is in B♭ major. Name the chord marked X.

A. IIb B. I7b C. I7 D. VIb

Answer: I7. X is B♭–D–F–A with B♭ in the bass: I7, a secondary 7th, root position.

4. This passage is in C major. Which figures go under the chord marked X?

Day 52: The diminished 7th chord

G7 Chords · about 40 minutes: warm-up 5 · teach 10 · together 10 · on his own 12 · game 3

1 · WARM-UP (5 MIN)

Today's practice in Philip's corner, or the first two 'together' questions below.

2 · TEACH (10 MIN)

Say: *"The diminished 7th sounds like a question that must be answered. Its answer is the tonic chord."*

- In a minor key, VII7 is built on the raised leading note: in A minor G♯–B–D–F. Every interval is a minor 3rd, so it sounds tense and unstable.
- Figures: 7 (root), ♯6/5 (b), ♯4/3 (c), 4/♯2 (d) in A minor: the ♯ shows the raised leading note.
- It resolves to I: the leading note rises, the 7th (F) falls. In third inversion (4/2) the bass falls to the 5th of the tonic (Ic) or to V.

Worked example

Spell the diminished 7th in D minor and resolve it.

1. Raised leading note: C♯.
2. Stack minor 3rds: C♯–E–G–B♭.
3. C♯ rises to D, B♭ falls to A, E and G move to D and F.

Watch out for

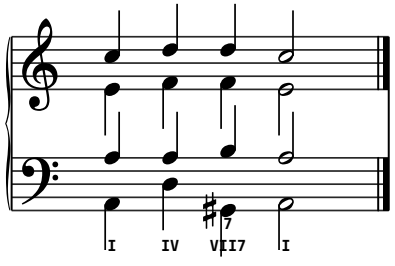

- Forgetting the accidental on the leading note.
- Calling it a dominant 7th: the dominant 7th has a major 3rd at the bottom.

In the exam: Score questions often ask 'name the chord at X' where X is a diminished 7th.

Show him these cards

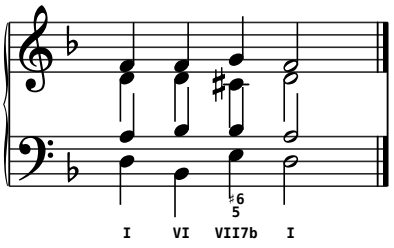

1

The diminished 7th: VII7 in a minor key. All minor 3rds: in A minor G♯–B–D–F.

2

In first inversion it's figured ♯6/5: the ♯ is the raised leading note.

3

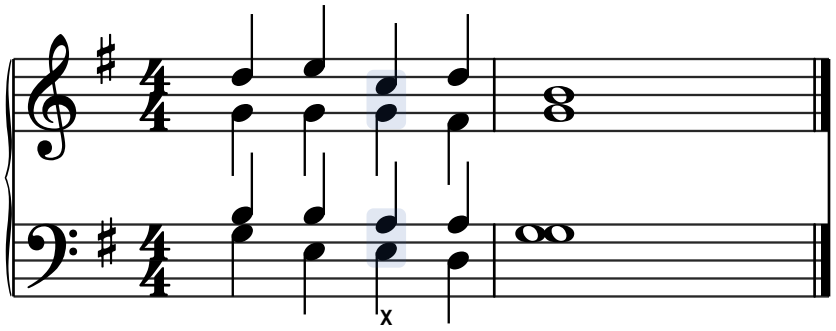

It resolves to I: the leading note rises, the 7th falls.

3 · DO TOGETHER (10 MIN)

- Write the diminished 7th in A, E and D minor in all positions, resolving each to I.

Day 53: The Neapolitan 6th

G7 Chords · about 40 minutes: warm-up 5 · teach 10 · together 10 · on his own 12 · game 3

1 · WARM-UP (5 MIN)

Today's practice in Philip's corner, or the first two 'together' questions below.

2 · TEACH (10 MIN)

Say: *“The Neapolitan is a dark, dramatic chord. It's like taking a step sideways just before the cadence.”*

- The Neapolitan is the major chord on the flattened supertonic: in C minor (or major) D♭–F–A♭. It is almost always in first inversion, so F is in the bass: the Neapolitan 6th (N6).
- Figure: ♭6 (in C major ♭6/♭3). It comes before V, often through Ic: N6–Ic–V–I or N6–V7–I.
- Double the bass (the 4th degree). The ♭2 falls to the leading note (a diminished 3rd), and the part writing should avoid an augmented 2nd.

Worked example

Spell the Neapolitan 6th in D minor.

1. The 2nd degree is E; flatten it: E♭.
2. Build a major triad: E♭–G–B♭.
3. First inversion: G in the bass, figured ♭6.

Watch out for

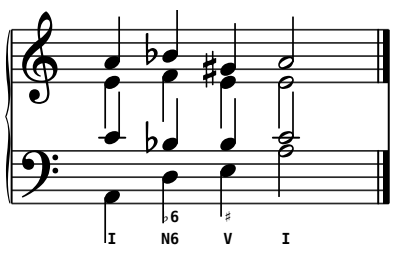

- Using it in root position (rare at Grade 7).
- Moving ♭2 up to ♮2 in the same part (a nasty chromatic step); let it fall to the leading note.

In the exam: Expect to spot or use an N6 before a cadence in minor keys.

Show him these cards

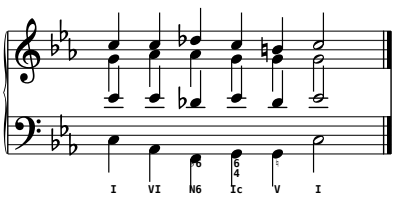

1

The Neapolitan 6th: the major chord on the flattened 2nd, in first inversion. In A minor: B♭–D–F, with D in the bass.

2

It often goes through Ic to V: N6–Ic–V–I.

3

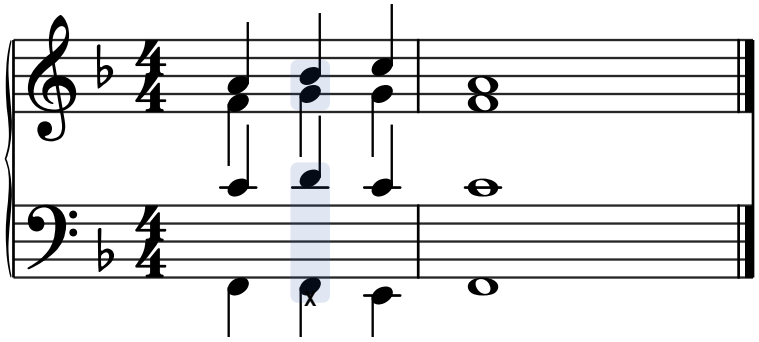

Double the bass (the 4th degree). The ♭2 falls to the leading note.

3. This passage is in F minor. Which figures go under the chord marked X?

A. ♭6 B. 6/♮5 C. ♮4/2 D. 4/♮2

ANSWERS (FOR MUM)

1. **C: a Neapolitan 6th**. X is E♭–G–B♭ (N6): a Neapolitan 6th. Its root is the flattened 2nd of the scale; it usually comes in first inversion and goes to V or Ic–V.

Day 54: Figures for every chord

G7 Chords · about 40 minutes: warm-up 5 · teach 10 · together 10 · on his own 12 · game 3

1 · WARM-UP (5 MIN)

Today's practice in Philip's corner, or the first two 'together' questions below.

2 · TEACH (10 MIN)

Say: *“Figures are a shorthand that Baroque keyboard players read like a chord chart.”*

- Figured bass (1620–1790 style) shows chords with numbers above the bass. Short forms: blank = 5/3; 6 = 6/3; 6/4; 7; 6/5; 4/3; 4/2 or 2.
- An accidental alone means the 3rd above the bass is altered. An accidental beside a number alters that note. A line after a figure holds that note over the next bass note.
- Suspensions and inner movement: 4 3 (a 4th falling to a 3rd over the same bass), 7 6, 9 8, 6 5 and 6/4 5/3 for a cadential 6/4.

Worked example

Figure V7b in E minor.

1. V7 = B–D♯–F♯–A; first inversion has D♯ in the bass.
2. Count up from D♯: F♯ (3rd), A (5th), B (6th): 6/5.
3. D♯ is the leading note but it's in the bass, so no accidental is needed in the figures: 6/5.

Watch out for

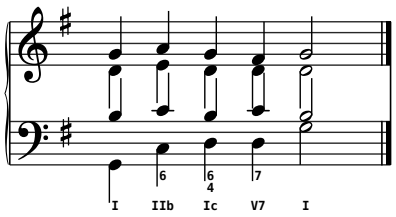

- Counting from the root instead of the bass.
- Missing accidentals in minor keys.

In the exam: Question 1 is all about figures; questions 4 and 5 may ask for the figure of a chord.

Show him these cards

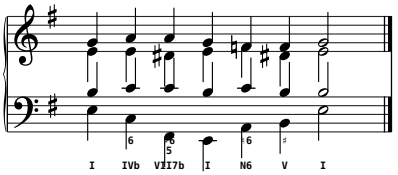

1

Figures count up from the bass: blank 5/3, 6, 6/4; 7, 6/5, 4/3, 4/2.

2

An accidental alone changes the 3rd; ♯6 changes the 6th. In minor, show the raised leading note every time.

3

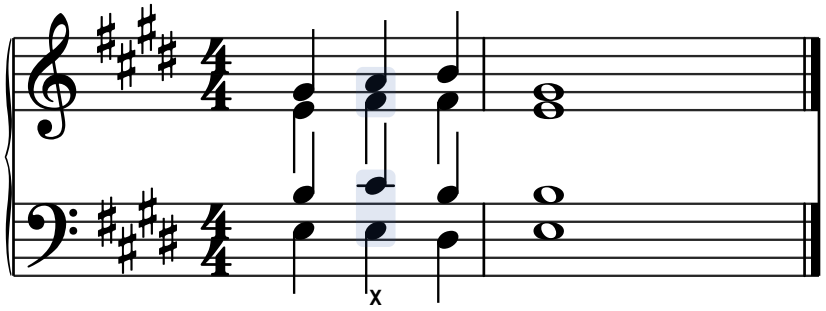

A line after a figure: hold that note into the next bass note. 4 3, 7 6, 9 8: a part moving over the same bass.

3 · DO TOGETHER (10 MIN)

- Figure ten chords from the lesson pack, including II7, VII7 and N6.

Four questions to work through together

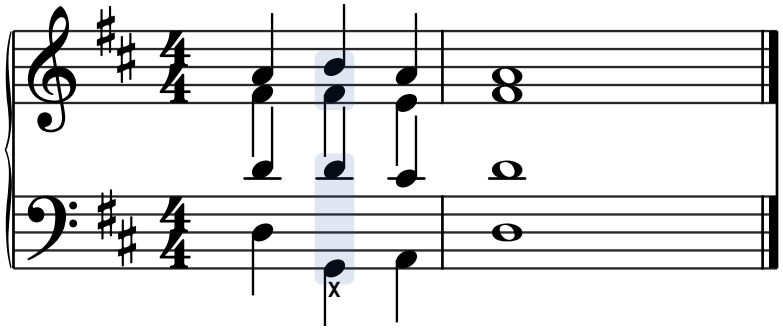

1. This passage is in E major. Which figures go under the chord marked X?

A. ♮6/♮ B. 5/3 (no figure) C. 4/3 D. 4/2

Answer: 4/2. X is II7d (F♯–A–C♯–E). Counting up from the bass E: 4 2.

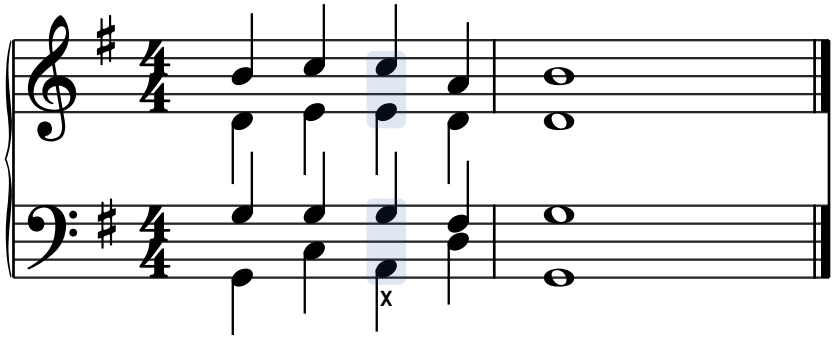

2. This passage is in D major. Name the chord marked X.

A. IV7d B. IV7 C. II7b D. VI7

Answer: IV7. X is G–B–D–F♯ with G in the bass: IV7, a secondary 7th, root position.

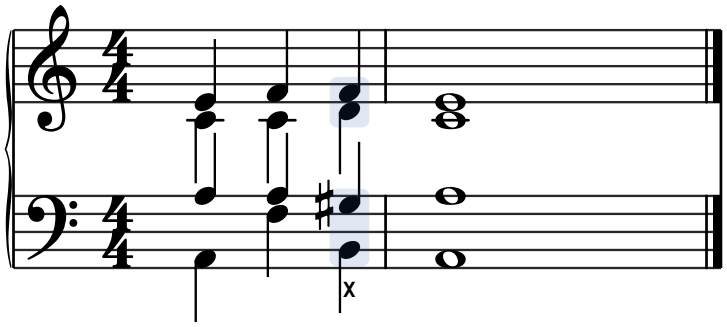

3. This passage is in G major. Name the chord marked X.

Answer: II7. X is A–C–E–G with A in the bass: II7, a secondary 7th, root position.

4. This passage is in A minor. What kind of chord is X?

A. a half-diminished 7th (VII7 in a major key) B. a dominant 7th C. a diminished 7th D. a Neapolitan 6th

Day 57: Question 1: figuring a bass, the method

G7 Figuring · about 40 minutes: warm-up 5 · teach 10 · together 10 · on his own 12 · game 3

1 · WARM-UP (5 MIN)

Today's practice in Philip's corner, or the first two 'together' questions below.

2 · TEACH (10 MIN)

Say: *"You're a detective: the melody and bass are the clues, and the figures are your solution."*

- The exam gives a melody and a bass. You show the chords (and the inner parts' movement) with figures under the bass.
- Method: 1. Find the key and any modulations. 2. Plan the cadences first. 3. For each bass note, list the chords that have this bass note AND contain the melody note. 4. Choose the one that makes a good progression. 5. Write the figures, with accidentals.
- Most bass notes get a root-position or first-inversion chord; use 6/4 only as a cadential, passing or pedal 6/4.

Worked example

Bass G, melody B, in G major: which chords fit?

1. Chords with G in the bass: I (G–B–D, 5/3) contains B.
2. VIb (E–G–B, figured 6) contains B too. IVc (C–E–G, 6/4) doesn't.
3. So 5/3 (I) or 6 (VIb): choose by the progression.

Watch out for

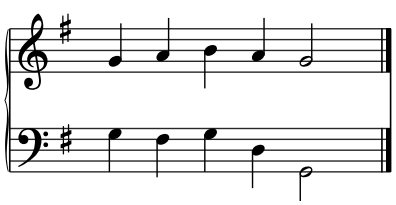

- Writing figures that make a chord without the melody note.
- Using a 6/4 without a reason.

In the exam: 15 marks. Check every chord contains the melody note.

Day 58: Choosing between chords: strong progressions

G7 Figuring · about 40 minutes: warm-up 5 · teach 10 · together 10 · on his own 12 · game 3

1 · WARM-UP (5 MIN)

Today's practice in Philip's corner, or the first two 'together' questions below.

2 · TEACH (10 MIN)

Say: *"A good progression has a sense of direction: each chord leans into the next."*

- Strong moves: the root falls a 5th (or rises a 4th): II–V, V–I, VI–II, I–IV. Also IV–V, V–VI.
- Avoid V–IV, and avoid using the same chord twice across a bar line. A chord on a strong beat should change from the one before.
- First inversions keep the bass smooth: use them when the bass moves by step.

Worked example

Melody C–B–C over bass A–G–C in C major: figure it.

1. A with C above: VI (5/3) or IVb (6).
2. G with B above: V (5/3).
3. C with C: I. IVb–V–I or VI–V–I: both fine; IV–V–I is stronger.

Watch out for

- Choosing chords one at a time without looking ahead to the cadence.

In the exam: Marks are for good harmony, not just correct chords.

Show him these cards

1

Strong: roots falling a 5th (II–V–I, VI–II), and IV–V. Weak: V–IV.

Day 59: Cadences and the cadential 6/4 in figures

G7 Figuring · about 40 minutes: warm-up 5 · teach 10 · together 10 · on his own 12 · game 3

1 · WARM-UP (5 MIN)

Today's practice in Philip's corner, or the first two 'together' questions below.

2 · TEACH (10 MIN)

Say: *"The cadential 6/4 is like a drum roll before the final chord."*

- Cadences: perfect (V–I), imperfect (–V), plagal (IV–I), interrupted (V–VI).
- A cadential 6/4 over the dominant bass is figured 6/4 then 5/3, often written 6 5 over 4 3. The figures show the two upper notes falling to the 5th and 3rd.
- In minor, the 5/3 on V needs ♯ (or ♮) for the raised leading note.

Worked example

How do you figure Ic–V in A minor?

1. Bass E for both chords.
2. Ic: 6/4 (C and A above E).
3. V: 5/3 with G♯: write ♯ (the raised 3rd).

Watch out for

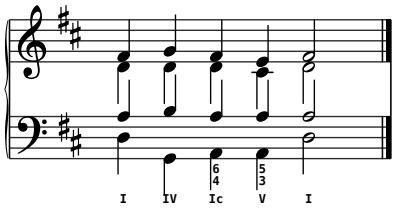

- Forgetting the ♯ on the 5/3 in minor.

In the exam: Almost every question 1 ends with a cadence that needs care.

Day 60: Showing inner-part movement: 4–3, 7–6, 9–8, 6–5

G7 Figuring · about 40 minutes: warm-up 5 · teach 10 · together 10 · on his own 12 · game 3

1 · WARM-UP (5 MIN)

Today's practice in Philip's corner, or the first two 'together' questions below.

2 · TEACH (10 MIN)

Say: *“The figures tell the player not only the chord, but how the inner voices move.”*

- Figures can show a part moving over a held bass: 4 3 (a suspended 4th falling to the 3rd), 7 6, 9 8, and 6 5 (a 6th moving up to a 5th or down a step).
- Over V at a cadence, 4 3 shows a suspended tonic falling to the leading note: in minor write 4 ♯ (the 3rd is raised).
- Use a line (—) after a figure when a note is held into the next bass note.

Worked example

How would you figure a 4–3 suspension over V in G minor?

1. Bass D; the held G is a 4th above.
2. It falls to F♯, the 3rd: raised.
3. Figures: 4 then ♯.

Watch out for

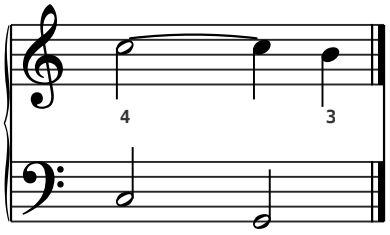

- Writing 4 3 when the note doesn't resolve down by step.

In the exam: Showing suspensions in the figures earns marks for 'inner-part movement'.

Show him these cards

1

Figures can show movement over one bass note: 4 3 (a suspended 4th falling to the 3rd).

2

3

Day 61: Minor keys: accidentals in figures

G7 Figuring · about 40 minutes: warm-up 5 · teach 10 · together 10 · on his own 12 · game 3

1 · WARM-UP (5 MIN)

Today's practice in Philip's corner, or the first two 'together' questions below.

2 · TEACH (10 MIN)

Say: *"In minor keys the figures do two jobs: they show the chord AND the accidentals."*

- In minor, any chord with the leading note needs an accidental in the figures: ♯ or ♮ for the raised 7th (V, V7, VII, VIIb, VII7).
- A ♯ or ♮ alone means the 3rd above the bass; ♯6 means the 6th; ♯4 or ♯2 in the diminished 7th's inversions.
- The Neapolitan needs ♭6 (or ♮6 in sharp keys).

Worked example

Figure V7c in D minor.

1. V7 = A–C♯–E–G; c position: E in the bass.
2. Above E: G (3rd), A (4th), C♯ (6th).
3. Second inversion is figured 4/3, but the 6th (C♯) is raised, so it must be shown: ♯6/4/3.

Watch out for

- Putting the accidental on the wrong figure.

In the exam: Minor-key accidentals are the most common lost mark in question 1.

Show him these cards

Day 62: Figuring with 7ths, diminished 7ths and the Neapolitan

G7 Figuring · about 40 minutes: warm-up 5 · teach 10 · together 10 · on his own 12 · game 3

1 · WARM-UP (5 MIN)

Today's practice in Philip's corner, or the first two 'together' questions below.

2 · TEACH (10 MIN)

Say: *"Colour chords are the spice: one or two in the right places make your answer sound like real music."*

- Choose a 7th chord when the melody has the 7th and it falls next: II7 or IV7 before V, VI7 before II.
- A diminished 7th (VII7) fits when the melody has the leading note or the 7th above it, and the next chord is I.
- The Neapolitan fits when the melody has the ♭2 (or the 4th or ♭6) and V follows.

Worked example

Melody F over bass D before a cadence in A minor: which chord?

1. Bass D with F: IV (D–F–A) or N6 (B♭–D–F, D in the bass).
2. If the melody next falls to E with V underneath, N6 is lovely: figure ♭6.

Watch out for

- Using colour chords everywhere: one or two per passage is plenty.

In the exam: Examiners reward harmony that's correct first and interesting second.

Show him these cards

1

II7 or IV7 when the melody has the 7th and it falls next.

2

VII7 (diminished 7th) when the melody has the leading note or the 7th, and I follows.

3

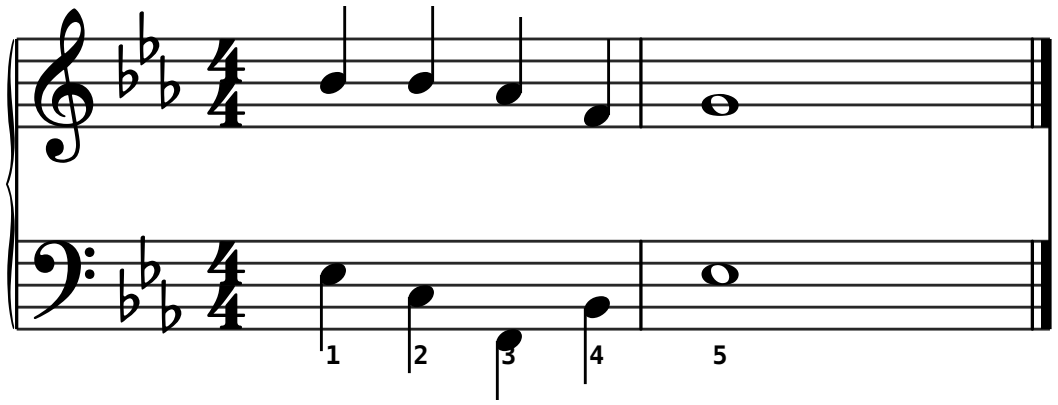

N6 when the melody has the ♭2 (or the 4th or ♭6) and V follows.

3 · DO TOGETHER (10 MIN)

- Find the best place for a II7, a VII7 and an N6 in the lesson pack passage.

1

Question 1: the melody and bass are given. Write the figures.

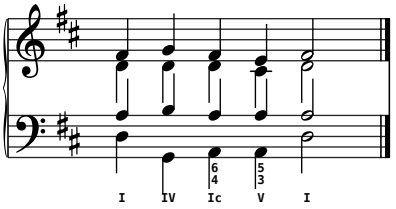

2

Strong: roots falling a 5th (II–V–I, VI–II), and IV–V. Weak: V–IV.

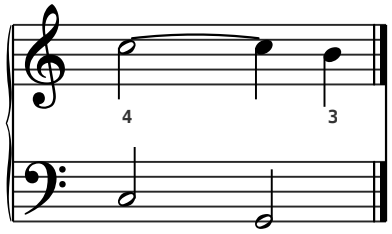

3

A cadential 6/4: 6/4 then 5/3 over the same dominant bass. Often written 6 5 over 4 3.

4

Figures can show movement over one bass note: 4 3 (a suspended 4th falling to the 3rd).

5

Minor keys: every chord with the leading note needs ♯ or ♮ in its figures.

6

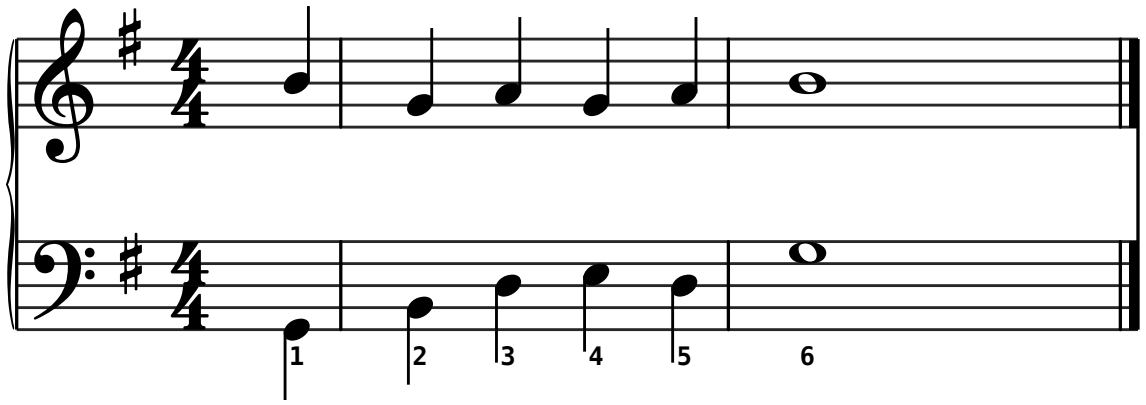

II7 or IV7 when the melody has the 7th and it falls next.
